“There is more money waiting to come into India, as long term and strategic investors are in the process of entering the market...”

Claus Martini

Global Chief Investment Officer,
Deutsche Bank Private Clients

Deutsche Bank has played an important role in meeting top Indian companies' financial and intellectual capital requirements. In the first quarter of year 2006, the bank was the leading underwriter to Indian companies seeking international capital.

In the debt markets, it is the leader in arranging international bonds for Indian companies. In equity linked products, the bank again holds the leadership position in arranging international convertible bonds for leading Indian companies.

India is also one of the global centres for Deutsche Bank and many global projects are now being executed out of India.
