

Young, Spirited Drivers of Enterprise

Every year, 250 Indian universities, 1500 research institutions and 10,000 higher education centres produce over 200,000 engineers and over 20,000 doctors.

There are over 5000 Ph.Ds and over 2.1 million graduates who 'think' and 'speak' in English. It is the brilliance of their drive, determination and dreams that turns the wheels of Indian entrepreneurship.

7 Indian Institutes of Technology (IITs), 6 Indian Institutes of Management (IIMs) and other centres of excellence mould the young leaders of tomorrow, who don the mantle of knowledge leadership in our competitive world.
