

On the Right Track

Delhi Metro Rail Corporation (DMRC) runs the world's only OHSAS 18001 (Occupational Health and Safety Assessment Sequence 18001] and ISO 14001 certified railway system in the world. It is the world's most eco-friendly railway system - plants ten times more trees than it cuts down.

Indian Railways is the largest and busiest rail network in the world. Running a total of 14,244 trains daily, that transport just under 5 billion passengers and almost 650 million tonnes of freight annually; it is the world's largest commercial employer, with more than 1.6 million employees.

Government of India is building dedicated freight corridors on the high density Western and Eastern routes, with an investment of US\$ 5 billion.
